

/*

1.Used to bring the program control to the next iteration of the loop.

2.The continue statements skips some code inside the loop and continues with the next iteration.

3.It is mainly used for a condition so that we can skip some lines of code for a particular condition.

*/

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
int i,age;
```

```
for(i=0;i<10;i++){
```

```
printf("%d\nEnter your age:\n",i);
```

```
scanf("%d",&age);
```

```
if(age>10){
```

```
continue;
```

```
}
```

```
printf("He is a good boy.");
```

```
}  
return 0;  
}
```
